About Me

I am a passionate Computer Engineering student with a strong interest in software development, design, and problem-solving. I excel in collaborative environments and am eager to gain hands-on experience through real-world projects. Currently, I am developing my skills in frontend development and UX/UI design, with a focus on delivering intuitive and visually compelling user experiences.

Education

Bachelor of Engineering Program in Computer Engineering and Digital Technology
Chulalongkorn University   2023 - current

High School
Triamudom Suksa School   2020 - 2023

Experience

Web Application Developer Intern
Obodroid Corporation Limited   Jun - Jul 2024

Contributed as a Software Developer Intern, focusing on creating a dashboard for SR1, a security robot. Gained valuable experience in software development and team collaboration.

Project

Abstract2Keywords   Nov - Dec 2024

A data science project utilizing data from the Chula University academic resource office to train models, extract keywords, and visualize results.

Roles: UX/UI design, Implemented frontend, data visualizations, Contributed to project proposal.

Friday Activity System   Nov 2024 - current
Chula Engineering

website for Chula Engineering's CEDT, designed to facilitate knowledge-sharing workshops and collaborations with real-world companies. Features include an attendance tracking system and a point-based rewards system, supporting activities held every Friday.

Roles: Assisted in UX/UI design, Implemented responsive frontend development.

FloraMate: Monitor and Maintain Your Pet Plant   Nov 2024

Web application to monitor and maintain plants by providing real-time updates on images, temperature, soil and air humidity, and light levels. AI analysis was integrated for plant health insights.

Roles: UX/UI design, Implemented responsive frontend development.

Mindlink System   Aug 2024 - current
MindLink (Start-up)

System to manage and maintain organizational tasks for tutors, including class management, payment processing, and dashboards.

Roles: Assisted in UX/UI design, Implemented responsive frontend development.

Net Down, Sprout Up   Feb - Apr 2024

Farming simulation game where players cultivate, plant, harvest, cook, and manage energy and inventory systems while advancing the storyline.

Roles: Designed features, Created gameplay mechanics, Developed interface.
