Yosita Rodwattanakul

Bangkok, Thailand | yosita.rd@gmail.com | +66 85 0936599

Computer Engineering student specializing in software development, with a strong foundation in frontend engineering and full-stack capabilities. Fast learner who thrives in fast-paced teams building modern, high-impact software solutions.

Education

Bachelor of Engineering Program in Computer Engineering and Digital Technology
Chulalongkorn University (2023 - November 2026)

High School
Triamudom Suksa School (2020 - 2023)

Skills

Programming Languages: TypeScript, JavaScript, SQL, Java, C++
Backend: Node.js, Express.js, RESTful APIs, Prisma ORM
Frontend: React, Next.js, TanStack Query, Zod, TailwindCSS
Databases & DevOps: PostgreSQL, GitHub Actions

Soft Skills: Communication, Leadership, Collaboration, Requirement Gathering
Languages: Thai (Native), English (TOEIC 920)

Experiences

Application Developer Intern, ExxonMobil **June 2026 – November 2026**

- Developed and maintained revenue analytics dashboards, resolving data-binding bugs and improving UX/UI.
- Built pre-calculation data flows in Pricefx to aggregate monthly data ahead of time, optimizing dashboard load times.
- Created a reusable GitHub Actions CI/CD workflow utilizing GitHub Copilot CLI and structured prompt engineering to automatically track codebase changes and publish documentation directly to GitHub or Azure DevOps (ADO) wikis.

Frontend Developer Intern, Cleverse Corporation CO., LTD. **June 2025 – July 2025**

- Built key frontend features for Aerogram (board-style AI workspace) implementing Folder Systems, Prompt History, Team Plans, and Shared Workspaces using React, Next.js, and TypeScript.
- Collaborated closely with backend developers and mentor to integrate APIs and refine system functionality.

Software Developer Intern, Obodroid Corporation Limited **June 2024 – July 2024**

- Contributed as a Software Developer Intern, focusing on creating a dashboard for SR1, a security robot. Gained valuable experience in software development and team collaboration.

Projects

NexusProcure **December 2025 – September 2026**

- Led stakeholder communication and alignment across all project phases, from defining Functional Requirements through implementation, UAT, and final delivery.
- Co-designed the system architecture, relational data models, RBAC, and workflow state machines.
- Implemented the core multi-step workflow on the frontend using React and TypeScript, managing complex state transitions, dynamic schema validation, and role-based views
- Built a notification engine to deliver real-time alerts and scheduled email reminders for task handoffs.
- Currently used by Chulalongkorn University's Procurement Division to manage procurement workflows.

Friday Activity System **November 2024 – September 2025**

- Built user-facing pages and custom components with React and TypeScript for a production-ready system used by CEDT students to manage activities and score tracking.

Activities & Achievements

Vice President, FECamp Club 2025 - Led Public Relations and IT divisions; directed the planning and execution of two major events—FEST and FECamp 19th—serving over 600 students combined.

Semi-Final, Intania Case Competition 2025 - Proposed a Cloud & AI–driven Urban Air Mobility (UAM) solution for ICC Airways, improving operational efficiency and sustainability.
